About Us

At AREquipment, we envision a better world, making it simpler and more comfortable in medical emergencies.

Through our portfolio of high-quality products – stretchers, trolleys, platforms, seats and other medical equipment – we are committed to developing functional and easy-to-use solutions for healthcare professionals, while ensuring maximum comfort for patients in high-pressure situations.

We recognise our responsibility to care for thousands of people every day. That is why we put people at the centre of our decisions, making the development of reliable, safe and functional products a priority.

This commitment has led us to create equipment that is recognised for its ease of use, robustness and durability, resulting in a minimum number of after-sales incidents.

A150

Stretcher Support

A150 *Freedom of movements*

The purpose of this stretcher support is to improve the performance of the trolley and stretcher assembly inside the ambulance, allowing transverse and longitudinal movements, giving the operator total freedom and control.

- Part of the structure in aluminium
- Transversal movement
- Longitudinal movement
- Incline to facilitate the entrance of the cots
- 3 fixation points
- Space for "scoop"

Weight

66 kg

Dimensions (closed)

1965 x 690 x 345 mm

Maximum Load Capacity

300 kg

Warranty

2 years

A150F

Stretcher Support

A150F *We facilitate all movements*

The A150F stretcher support is a manually operated device with a flat top surface, which allows other fasteners to be installed.

- Part of the structure in aluminium
- Transversal movement
- Longitudinal movement
- Incline to facilitate the entrance of the cots

Weight

84 kg

Dimensions (closed)

1930 x 690 x 290 mm

Maximum Load Capacity

300 kg

Warranty

2 years

A200

Stretcher Support

A200 Because life is too short for a manual stretcher support

The A200 is about sophistication, power and evolution. We designed it to make loading and unloading as simple as it should, you give the order and the machine does the heavy work. Simple.

- Light structure - partially in aluminium
- Tilt to ease the entry of the table
- 3 attachment points
- Transverse and longitudinal movements
- Stretcher IN/OUT electrical movement
